Vista Labels Ltd was formed by company Chairman Don Grice on the 6th May 1974. Vista has always manufactured in Stockport, Cheshire and have been at the present location since 1981.

The standards of Quality, Value and Service that Don instilled in those early days are still the backbone of the company today.

As one of the UK's foremost label printers Vista has achieved many accreditations and accolades including internationally recognised print awards, whilst continuing to advance the boundaries of excellence.

Constantly seeking new and improved manufacturing processes, Vista has made substantial investments in state-of-the-art inkjet digital technology and developed innovative production techniques to raise quality and drive down costs, whilst actively pursuing a policy of waste management and ethical trading.

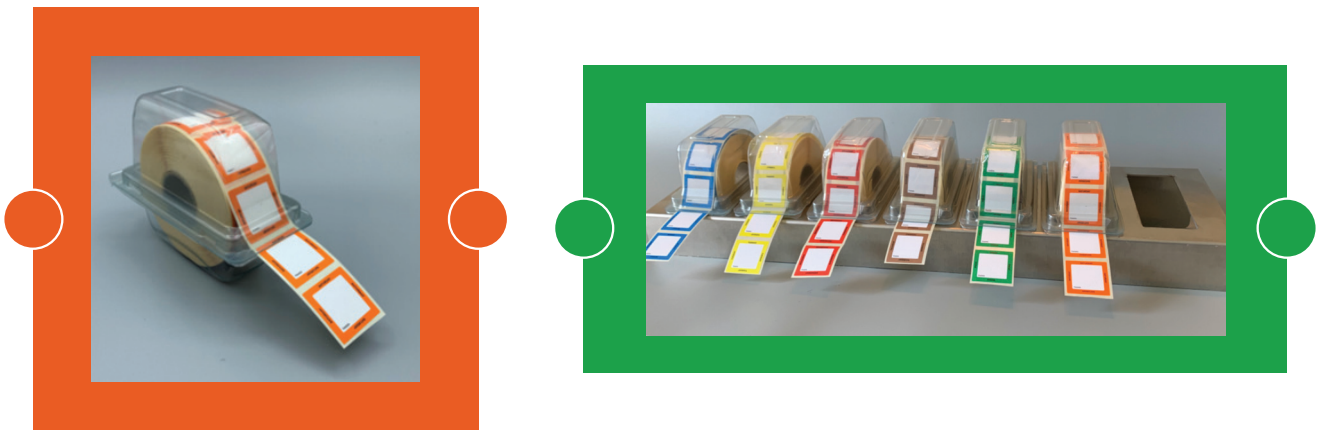

Working closely with customers and offering accurate on time solutions for their needs is what Vista's past and future success is built on.

Now working with the team at HuCo Services, Vista Labels are proud to bring to the HORECA market a range of food rotational and food safety labels. The team at HuCo have over 55 years experience in the HORECA industry, and it's founder, Greg Fitchett has led a number of businesses here in the UK and Internationally in this specific field.

With the combination of manufacturing and service excellence along with a forward thinking "can do attitude" you are assured of best in practice products and service excellence that the ever changing HORECA market demands.

The **LabelSafe™** general portfolio of products all are supplied in their own individual rPET single use dispensers. This reduces the need of external wrapping and the additional waste that this creates. The labels are secure from operational damage such as water and liquid splashes whilst also protecting the labels from outside airborne particles and potential harmful viruses. After use, both the cardboard core and rPET dispenser can be recycled through the paper and plastic recycling waste management systems.

The **LabelSafe™** label, in its rPET dispenser can easily be “dropped” into a universal rack which is both wall mountable and desk top enabled. This eliminates the time and costly process required to load labels into many manual dispensing systems. Each individual roll can be simply removed and placed in any part of the operation. All the labels will be protected, and will not “roll out” across the kitchen, creating further waste and loss of time! After use simply replace back in the holder for easy management. The dispensers and the holders can be hand washed to again improve safety in any facility.
